

2015: A BANNER YEAR IN REVIEW

Seattle, WA – December 15, 2015 – As 195 countries around the world embrace solidarity with the signing of the Paris climate agreement, Impact Bioenergy continues to make progress taking climate action. The team has commissioned and exported their first HORSE microdigester, in time for the holidays, to their client and channel partner in Surrey, British Columbia. "I'm thankful to have had a solid customer base to support the appetite of this machine," says Aeron Jansen, owner of GreenerZone.

From Waste to Watts - Happy Holidays!

Multiple recent awards, detailed below, have provided more encouragement and credibility for the team's first CSB (Community Supported Biocycling) project. The City of Seattle has contracted the team to demonstrate their hyperlocal CSB model through 2016 with Fremont Brewing Company and Seattle Urban Farm Company. With funds recently raised through their grassroots Kickstarter campaign, the Impact team has started fabricating multiple second generation HORSEs to deploy in March. Impact's modular bioenergy systems provide a trifecta or "Triple Crown" of solutions including food waste recycling, renewable energy generation and natural plant food production. The HORSE for the Seattle CSB project has been dubbed *Fremont Slew*, after an American Thoroughbred race horse named *Seattle Slew* who won the Triple Crown in 1977.

**Recent Awards**

November 18, 2015 – *Impact Bioenergy won the Organics Innovation award from the Washington Organic Recycling Council* at their annual meeting. WORC's Annual Conference draws professionals from the US and Canada to learn and share cutting edge technology, challenges, and sustainable solutions in organics recycling, processing, markets, regulation and education. <http://www.compostwashington.org>

November 12, 2015 – *Impact Bioenergy's CSB competed against 70 Puget Sound companies for Kitsap Bank's edg3 FUND, finishing as a top five finalist.* The competition aims to "provide funding for entrepreneurs dedicated to growing our community economically, socially, and environmentally" according to the bank's website. The QR code links to their 45 sec promotional video also posted on our site at <http://impactbioenergy.com/csb/>.

October 26, 2015 – *The Global Cleantech Cluster Association named Impact Bioenergy as one of 30 companies globally* and one of five companies from the Washington to its [Global Top 30](#) Later Stage Awards. Impact was recognized at a global award ceremony in Taipei in November. "No one beats Washington State in cleantech innovation," said J. Thomas Ranken, President and CEO of the Cleantech Alliance. "Each of the five Washington State finalists is doing tremendously important work that will shape the way human kind functions for decades to come." <http://www.globalcleantech.org/awards>
